

Fact Finding Mission to The European Molecular Biology Laboratory

Headquarters Heidelberg (Germany)
November 2009

Malta Enterprise and the Malta Council for Science and Technology are organizing a fact finding visit to the European Molecular Biology Laboratory (EMBL) with the intention of identifying areas of collaboration in the field of Molecular Biology.

Locally based industrialists and academics are invited to propose specific areas of collaboration including details of their interest to be included in the discussions. EMBL focuses primarily on Structural Biology; Biochemistry; Developmental Biology; Cell Biology and Computational Biology.

The technology and instrumentation that they have available is:

- X-ray crystallography using synchrotron radiation
- DNA sequencing
- Cell Fractionation
- Light and electron microscopy
- Mass spectrometry of proteins
- Automated cell microinjectors

Further information and areas of collaboration can be found on their website www.embl.de. Individuals with strong proposals may be invited to accompany the visit.

Interested individuals are to send a collaboration proposal details together with their CV to joseph.sammut@maltaenterprise.com or christine.m.grixti@gov.mt by not later than Friday 30th October 2009. The visit will take place during the last quarter of 2009. The date will be communicated to the selected individuals.
